

HEALTHY RIVERS PARTNERSHIP

Do you want to show that you care about Washington's environment?

Do you support healthy flowing rivers & streams in Washington?

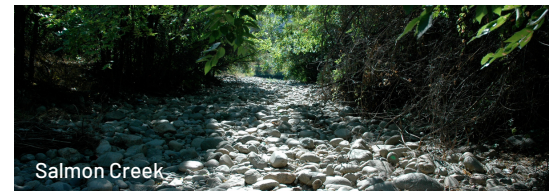

Does your business/organization use water?

The Healthy Rivers Partnership is a way for businesses and organizations operating in Washington to give back to rivers & streams across the state. As a WWT Healthy Rivers Partner you are helping to put water back into Washington's rivers & streams for the salmon and other creatures that need abundant cool clean water to survive, and to the people of Washington who love and depend upon beautiful flowing rivers & streams in their communities.

THE CHALLENGE FACING WASHINGTON'S FRESHWATER

Healthy rivers & streams need sufficient water year-round. Even rivers that flood frequently are often so depleted by withdrawals for out-of-stream uses in the summer that salmon and steelhead struggle to survive, and the recreational, cultural and spiritual values of rivers are diminished. We have pushed many of Washington's rivers to the brink and now climate change is making the situation worse. The need is urgent to restore as much water as we can to our rivers & streams before it's too late.

**The good news is you can help by becoming a
Healthy Rivers Partner!**

WHY SHOULD YOU BECOME A HEALTHY RIVERS PARTNER?

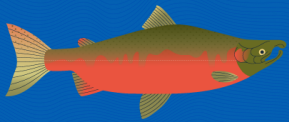

- Your business/org uses water which has an impact on the environment - it's a way to give back to WA's streams.
- Washington's water is a public resource that belongs to all the people of Washington - take care of what's yours!
- You can help ensure that Washington remains a beautiful place to live and play.
- Support a local non-profit working for local solutions.
- It's good business! Customers/clients like supporting a business that cares about the environment.
